

ZimVie Announces FDA Clearance and U.S. Launch of GenTek® Restorative Components

July 23, 2024

Addition of Premium Restorative Components Enhances ZimVie's End-to-End Implant Offerings

PALM BEACH GARDENS, Fla., July 23, 2024 (GLOBE NEWSWIRE) -- ZimVie Inc. (Nasdaq: ZIMV), a global life sciences leader in the dental market, today announced the U.S. launch of its GenTek® Genuine Restorative Components product portfolio. The launch expands ZimVie's portfolio of end-to-end prosthetic offerings and follows the recent receipt of FDA 510(k) clearance. ZimVie first launched the GenTek portfolio in Europe in 2019 and has seen tremendous success in that market to date.

The introduction of GenTek to the U.S. market brings a broad offering of differentiated restorative components to the ZimVie product family. The GenTek restorative portfolio is comprised of Ti-Bases, pre-milled abutment blanks, screws, instruments, and ancillary products to support digitally driven CAD/CAM restorations. Manufactured and designed to mate with ZimVie implant systems, the genuine connection* ensures a perfect fit and tight seal to support long-term aesthetic and functional restorations.

"We're excited to expand our product portfolio with the introduction of GenTek premium prosthetic components, enabling digital workflows and patient-specific restorations for U.S. customers," said Indraneel Kanaglekar, SVP, Chief Commercial Officer. "We have received excellent feedback and strong demand for GenTek in the European market, and we are optimistic that this product suite will be well received here in the U.S. – the largest market we serve."

About GenTek®

Genuine connection components are designed and manufactured to minimize the micro-gaps and micro-movements for a robust and stable interface between the implant and abutment. GenTek CEREC® compatible (Sirona inCoris Meso Block) and angulated screw channel Ti-Bases, pre-milled abutment blanks, and scan bodies are part of a complete and open digital workflow. Products are available for ZimVie's TSX®/TSV®/Trabecular Metal®, T3® PRO/Certain®, and Eztetic® Dental Implant Systems.
